

idOS Developer Console — Terms & Conditions

Effective 15 May 2026

Read this first. These Terms are a binding contract between you and idOS Association. They govern your use of the **idOS Developer Console** and the **idOS Relay** (sandbox and production). They include eligibility and sanctions representations, a real-data ban in the sandbox, a disclaimer of warranties, a tight cap on our liability, a broad indemnity you owe us, and Swiss law with exclusive jurisdiction in Zug. **If you don't agree, do not click "I agree" and do not access the service.**

1. Parties and Acceptance

1.1 These Terms are entered into between **idOS Association**, a Swiss association with registered office at Baarerstrasse 43, 6300 Zug, Switzerland ("**idOS**", "**we**", "**us**"), and the individual or legal entity accepting them ("**you**", "**Customer**"). You accept these Terms by clicking "I agree", signing the wallet-based acceptance message, or otherwise accessing or using the idOS Developer Console or the idOS Relay.

1.2 If you accept on behalf of an entity, you warrant that you are at least 18, of full legal capacity, and authorised to bind that entity. We may rely on your representation of authority without further inquiry.

1.3 Records of acceptance. Our logs of your acceptance (timestamps, IP addresses, wallet addresses, version of the Terms shown) constitute prima facie evidence of acceptance and of the version accepted. You are responsible for the access controls over your Customer Account and your wallet, and bear the consequences of any acceptance made by anyone with access to them.

2. What the Service Is — and Isn't

2.1 The **idOS Developer Console** is a self-serve interface that lets you configure and manage your integration with the idOS Network. The **idOS Relay** is a managed orchestration service that lets you trigger **Journeys** — end-to-end flows in which an identity-verification provider ("**KYC Provider**", e.g. Persona or Sumsub) is loaded in an iframe for an **End User**, and, on success, an idOS profile and Credentials are created on the idOS Network. Capitalised terms not defined here have the meanings in the idOS User Agreement and the idOS Transparency Document.

2.2 What we are not. idOS is not a bank, payment institution, e-money institution, electronic identification scheme operator, identity-verification provider, custodian, broker, exchange, or trust-services provider. We don't issue, transmit, redeem, custody, or guarantee funds or digital assets, and we don't perform identity verification, biometric verification, sanctions screening, or adverse-media checks ourselves.

2.3 You're the obliged entity. You — not idOS — are the obliged entity for any AML, CTF, sanctions, consumer-protection, payment-services, data-protection, age-gating, or other regulated activity in

connection with your product or service. You're responsible for determining whether your use of the idOS Relay is compliant with the laws applicable to your business and your End Users.

2.4 No exclusivity; no tying. Nothing in these Terms requires you to use any specific KYC Provider or prevents you from using competing services.

3. Sandbox vs. Production

3.1 Sandbox is for testing only. The Sandbox Environment (currently at app.playground.idos.network, and any other environment we designate as sandbox, staging, beta, playground, or preview) is provided for development, integration testing, and internal demonstrations. You represent and warrant that you will **not**: (a) use the Sandbox with real End Users; (b) submit personal data of any natural person other than your own staff acting as test subjects with informed consent; (c) present the Sandbox to your actual customers as a live service; or (d) rely on Sandbox configurations, identifiers, Credentials, or balances as Production. Data submitted to the Sandbox may be processed, retained, replayed, or deleted by us for the purposes of operating and improving it.

3.2 Production access requires our authorisation. We issue production credentials only after you have completed the compliance-brief and verification steps in the idOS Developer Console, accepted the **idOS Relay Pay-As-You-Go agreement ("PAYG Agreement")** once we make it available, and, where applicable, completed business-verification checks we request. We may refuse, defer, condition, or revoke production access at any time.

3.3 Beta features. Anything labelled "beta", "experimental", "preview", or similar is provided strictly "as is" and may change or be withdrawn without notice.

3.4 No SLA in Sandbox or free tier. We provide no uptime, throughput, or other service-level commitments for the Sandbox, free-tier usage, or beta features. Production service levels, if any, will be set in the PAYG Agreement once activated.

4. Your Account, Wallet, and API Credentials

4.1 Account. You must register a Customer Account in the idOS Developer Console and provide accurate, current, and complete information. We may require identity verification, KYB, or other due diligence (including by third parties), and may suspend or terminate the Customer Account if you fail to comply or provide false information.

4.2 Wallet authentication — your risk. You authenticate using a cryptographic wallet that you alone control. We don't custody, recover, or access your private keys or seed phrases. Loss of the wallet (including via SIM-swap, phishing, malware, or theft) may result in unrecoverable loss of access and is your risk. Any action performed under a wallet signature linked to your Customer Account is treated as authorised by you. We may make a wallet-rotation procedure available in the future; absent such a procedure, you should treat the wallet linked to your Customer Account as a long-lived secret.

4.3 API Credentials. The Relay client ID we issue is a public identifier and may appear in client-side code. All other API credentials — signing key, secret key, OAuth client secret, webhook signing secret,

etc. ("**Private Credentials**") — are confidential, must be stored server-side only, and must never be embedded in client-side code, mobile apps, public repositories, browser extensions, logs, or error reports. You must rotate Private Credentials regularly and immediately upon suspected compromise or departure of an Authorised User. Notify us at legal@idos.network of any actual or suspected compromise without delay.

4.4 Attribution. All activity under your Customer Account, all calls authenticated with your API Credentials, and all actions by your employees, contractors, and other authorised users ("**Authorised Users**") are deemed taken by you and are your responsibility. Your only remedy for unauthorised use is to notify us so we can revoke the affected credentials; we have no liability for unauthorised use before or after revocation.

4.5 No multi-accounting. You may not create or operate multiple Customer Accounts (directly or through related parties or proxies) to circumvent rate limits, fair-use thresholds, free-tier caps, sanctions screens, or any other restriction. We may identify related accounts using IP, wallet, payment instrument, KYB data, browser fingerprint, or other means, and may consolidate, suspend, or terminate them.

5. Journeys, KYC Providers, and End Users

5.1 Configuration is on you. You select the KYC Provider, the verification level (e.g. Basic Liveness, Plus Liveness), the data fields, and the accepted jurisdictions. You're solely responsible for determining whether the Journey, as configured, is sufficient for any regulatory obligation that applies to you.

5.2 The KYC Provider is the verifier. The KYC Provider — not idOS — performs identity verification, document checks, biometric processing, liveness, and screening, under its own terms and licences. We don't make, review, override, or guarantee any verification decision. By initiating a Journey, you agree to comply with the KYC Provider's then-current terms and policies (as we make them available or as published by the provider). You authorise us to share Customer information with the KYC Provider as needed to deliver the Journey.

5.3 End-User click-through. Before any Journey starts, you must present the End User with the [idOS User Agreement](#), the [idOS Privacy Policy](#), and the [idOS Transparency Document](#) via current, working hyperlinks, and use the click-through wording we make available — at minimum: *"By continuing, you agree to the Terms & Conditions and confirm you have read the Privacy Policy and Transparency Document."* You must obtain and retain evidence of End-User acceptance (timestamps, document versions shown, identifiers) for the period required by applicable law, and provide it to us on reasonable request.

5.4 Don't speak for us. You must not present the idOS Relay or the idOS Network as your own product, "white-label" the idOS Relay, hold yourself out as a KYC-as-a-service provider using the idOS Relay as the underlying engine (without our written consent), or make any statement, warranty, or commitment on idOS's behalf.

5.5 Iframe integrity. You must not instrument the parent page or the iframe to read, intercept, log, screenshot, replay, or transmit data exchanged between the End User and the KYC Provider, and must not retain raw biometric data or identity-document images outside the strict scope of the KYC Provider's

processing, except where required by applicable law and clearly disclosed to the End User. You must maintain reasonable security in the page that loads the iframe.

6. Fees, Taxes, and No Refunds

6.1 Free during preview. During the current preview period, use of the idOS Developer Console and the idOS Relay is free of charge, subject to rate limits, volume caps, retention limits, and feature gates we set from time to time. We may modify or remove the free preview at any time without liability.

6.2 PAYG will govern paid usage. When we activate paid usage, it will be governed by a separate **idOS Relay Pay-As-You-Go agreement ("PAYG Agreement")** that you'll need to accept before being granted Production access or before any paid feature is enabled on your account. In case of conflict between these Terms and the PAYG Agreement in respect of fees, billing, refunds, credits, suspension for non-payment, or service levels, the PAYG Agreement prevails for paid usage.

6.3 Taxes. Once paid usage begins, fees will be exclusive of VAT, sales, GST, withholding, or similar taxes; those will be your responsibility (other than taxes on our net income).

6.4 No refunds for completed Journeys. Where paid usage applies, a Journey is deemed delivered when initiated, regardless of the verification outcome and regardless of whether the End User completes it. No refunds, credits, or chargebacks are available, except where required by law, where the PAYG Agreement says so, or where a Journey fails entirely and solely due to a documented material technical failure of the idOS Relay itself (in which case the exclusive remedy is a credit for the relevant fee).

6.5 Anti-chargeback. You must first raise any billing dispute in good faith with us at legal@idos.network. Any chargeback initiated in breach of this clause is a material breach and entitles us to immediate suspension or termination and recovery of the disputed amount plus reasonable collection costs and legal fees.

6.6 Suspension for non-payment. Once paid usage applies, we may suspend access without notice if any amount owed is overdue or we reasonably believe you are unable or unwilling to pay. Suspension does not relieve you of payment obligations.

7. Eligibility, Sanctions, and Restricted Jurisdictions

7.1 You represent and warrant that:

- you and your Authorised Users will comply with these Terms, the PAYG Agreement (once applicable), the terms of any upstream service (KYC Provider, infrastructure provider, etc.), and all applicable laws — including data-protection, AML/CTF, sanctions, consumer-protection, and export-control laws;
- you have not been previously suspended or terminated from the idOS Developer Console, the idOS Relay, or the idOS Network;
- you maintain a sanctions and AML/CTF screening program calibrated to your use case and End Users, at least at the level required by applicable law, and you re-screen when lists are updated;

and

- you maintain reasonable information-security, privacy, acceptable-use, and complaint-handling controls in respect of your use of the service.

7.2 No sanctioned persons. Neither you nor any of your subsidiaries, directors, officers, employees, Authorised Users, ultimate beneficial owners, or persons acting on your behalf is (a) a designated person on any EU, US (OFAC), UN, UK, SECO, or other applicable sanctions list, (b) owned or controlled by such a person, (c) located, organised, or resident in a country subject to comprehensive sanctions, or (d) engaged in any dealings with any such person, government, project, or jurisdiction in violation of sanctions. These representations are continuing and you'll notify us promptly if any becomes inaccurate.

7.3 Restricted Jurisdictions. The idOS Developer Console and the idOS Relay are not available to, and must not be used by or on behalf of, any person who is a resident of, organised in, or accessing from: Afghanistan, Algeria, Angola, Belarus, Bolivia, Bulgaria, Burkina Faso, Cameroon, Congo (Democratic Republic of the), Haiti, Iran, Ivory Coast, Korea (North), Laos, Lebanon, Mali, Monaco, Mozambique, Myanmar, Namibia, Nepal, Russia, South Sudan, Syria, Tanzania, Trinidad and Tobago, Vanuatu, Venezuela, Virgin Islands, Yemen (the "**Restricted Jurisdictions**"). You must not direct any End User from a Restricted Jurisdiction into a Journey. We may amend the list at any time; additions apply prospectively to new onboardings only.

8. Acceptable Use

You may use the idOS Developer Console and the idOS Relay only to integrate the idOS Network into your own product or service, for your own internal business purposes, and in compliance with these Terms, the Documentation, and applicable law. Without limiting anything else, you must not (and must not allow any Authorised User, End User, or third party to):

- use the service for any unlawful, fraudulent, deceptive, harmful, or infringing purpose, or to facilitate activity that could lead to death, personal injury, or environmental damage;
- integrate the service with any product or activity that is illegal or unlicensed in a jurisdiction where licensing is required (including unlicensed financial services, unlicensed gambling, narcotics, weapons, unlicensed medical services, or human-trafficking-adjacent activities);
- use the service to onboard a sanctioned person or a person in a Restricted Jurisdiction, or to help circumvent sanctions, geoblocking, age limits, or any other eligibility restriction;
- resell, sublicense, lease, rent, syndicate, white-label, or otherwise make the service available to a third party as a standalone service, or wrap the idOS Relay as your own KYC, identity, or compliance product, except with our written consent;
- copy, reverse engineer, decompile, disassemble, or attempt to extract any non-open-source source code, algorithm, model, or trade secret from the service;
- introduce viruses, malware, or other destructive components;

- interfere with or disrupt the service, exceed rate limits, or conduct load, penetration, or fuzz testing without our prior written consent;
- create synthetic, fake, or non-bona-fide End Users, Journeys, or Credentials, or use the service to benchmark it for competitive purposes;
- intercept, log, or otherwise capture data exchanged inside the iframe (see Section 5.5);
- use the service or data obtained from it to develop, train, or assist any third party in developing a product that is or could be competitive with the idOS Network or the idOS Relay;
- use idOS's name, logo, or trademarks except as permitted in Section 11;
- misrepresent fees, capabilities, or compliance posture as ours; or
- engage in any activity that, in our reasonable opinion, creates material legal, regulatory, reputational, or security risk for us.

9. Data Protection

9.1 Roles. Unless we sign a written data-processing addendum:

- for personal data of your Authorised Users that you submit to us, idOS acts as an **independent controller** under the [idOS Privacy Policy](#);
- for personal data of End Users processed in a Journey and in the idOS Network, you and idOS each act as **independent controllers** for our respective processing; you are solely responsible for the End-User-facing legal bases, notices, consents, and data-subject rights; and
- the KYC Provider acts as a controller or your processor under its own terms; we're not a party to that processing.

9.2 Joint-controller fallback. If a competent authority or court determines that you and idOS are joint controllers under Article 26 GDPR (or equivalent), you are the primary controller for End-User-facing obligations and indemnify us for any allocation that exceeds our actual fault.

9.3 International transfers; sub-processors. Providing the service involves international transfers to Node Operators, KYC Providers, infrastructure providers, and other sub-processors. You instruct us to carry out such transfers using appropriate mechanisms (Standard Contractual Clauses, the UK Addendum, the Swiss-EU framework, the EU-US Data Privacy Framework where applicable). Our sub-processor list is available on request.

9.4 Security and breach notice. Each party will maintain appropriate technical and organisational measures. If you become aware of a personal-data breach that affects data exchanged through the idOS Relay or that may affect us, you'll notify us without undue delay and cooperate on incident response.

10. Confidentiality

Each party will keep the other's non-public information confidential and use it only as needed to perform under these Terms. Standard exclusions apply (already public, independently developed, lawfully received from a third party, or required to be disclosed by law — with prior notice where lawful). The Private Credentials and any non-public technical and pricing information we make available are our Confidential Information. These obligations survive for five (5) years after termination; trade-secret protections continue for as long as the information qualifies as a trade secret.

11. Intellectual Property; Publicity

11.1 Ownership. idOS and its licensors retain all right, title, and interest in the idOS Developer Console, the idOS Relay, the idOS Network (other than open-source components), the SDK, the Documentation, and related materials. All rights not expressly granted are reserved. We don't provide an IP indemnity.

11.2 Customer materials. You retain all rights in your product, content, and data ("**Customer Materials**"), and grant us a non-exclusive, worldwide, royalty-free licence to use them as needed to provide the service.

11.3 Feedback. Any feedback you give us is non-confidential, and you grant us a perpetual, irrevocable, worldwide, royalty-free, sublicensable licence to use it for any purpose.

11.4 Trademarks; publicity. You may not use our name, logos, or trademarks except for factual references to integration with the idOS Network, or as we authorise in writing. We may identify you as a user of the service (including using your name and logo in customer lists and marketing) unless you opt out in writing to legal@idos.network.

12. Third-Party Services

The service relies on third parties including KYC Providers, cloud providers, blockchains, Node Operators, and wallet providers. We don't control or endorse any of them. To the fullest extent permitted by applicable law, we are not responsible for the availability, accuracy, security, or quality of any third-party service or for any acts or omissions of any third party. Your use of any third-party service is at your own risk and subject to the third party's own terms.

13. Service Changes

We may modify, suspend, or discontinue the service or any feature at any time. For material adverse changes that affect Production, we'll use commercially reasonable efforts to give at least 30 days' advance notice through the idOS Developer Console or by email, except where the change is required by law, is necessary to address a material security or operational risk, or is to your benefit. We're not obliged to maintain backward compatibility with prior SDK or API versions. Use after the effective date is your acceptance; if you don't accept, your remedy is to terminate.

14. Disclaimer

EXCEPT AS EXPRESSLY STATED IN THESE TERMS OR IN AN APPLICABLE PAYG AGREEMENT, AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, THE idOS DEVELOPER CONSOLE, THE idOS RELAY, THE idOS NETWORK, THE SDK, AND THE DOCUMENTATION ARE PROVIDED "AS IS" AND "AS AVAILABLE", WITH ALL FAULTS AND WITHOUT WARRANTY OF ANY KIND (EXPRESS, IMPLIED, OR STATUTORY), INCLUDING WARRANTIES OF MERCHANTABILITY, SATISFACTORY QUALITY, FITNESS FOR A PARTICULAR PURPOSE, ACCURACY, RELIABILITY, SECURITY, AND NON-INFRINGEMENT. WE DO NOT WARRANT THAT THE KYC FLOW WILL DETECT FRAUD OR IMPERSONATION; THAT VERIFICATION OUTCOMES ARE ACCURATE OR SUFFICIENT FOR YOUR REGULATORY OBLIGATIONS; THAT THE SERVICE WILL BE UNINTERRUPTED, ERROR-FREE, OR SECURE; OR THAT ANY DATA WILL BE PERSISTED OR RECOVERABLE. THE SANDBOX, FREE TIER, AND BETA FEATURES ARE PROVIDED STRICTLY "AS IS" AND MAY BE WITHDRAWN AT ANY TIME WITHOUT NOTICE OR LIABILITY. YOU ACKNOWLEDGE THAT, BECAUSE OF THE ARCHITECTURE OF THE idOS NETWORK (BLOCKCHAINS, DECENTRALISED STORAGE, TIME-LOCKS), CERTAIN INFORMATION (TRANSACTIONS, METADATA, PUBLIC NOTES) MAY REMAIN STORED OR PUBLIC EVEN AFTER A DELETION REQUEST.

15. Limitation of Liability

15.1 Excluded damages. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, NEITHER PARTY IS LIABLE TO THE OTHER FOR INDIRECT, INCIDENTAL, SPECIAL, CONSEQUENTIAL, EXEMPLARY, OR PUNITIVE DAMAGES, OR FOR LOST PROFITS, LOST REVENUES, LOST BUSINESS, LOST GOODWILL, LOST DATA, LOSS OF CRYPTOCURRENCY OR DIGITAL ASSETS, LOSS OF ACCESS TO THE idOS NETWORK OR ANY BLOCKCHAIN, OR REGULATORY FINES OR PENALTIES, EVEN IF ADVISED OF THE POSSIBILITY.

15.2 Aggregate cap. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, OUR AGGREGATE LIABILITY ARISING OUT OF OR IN CONNECTION WITH USE OF THE idOS DEVELOPER CONSOLE, THE idOS RELAY, OR THE SANDBOX IS LIMITED TO **ONE SWISS FRANC (CHF 1)** IN THE AGGREGATE. ANY HIGHER LIABILITY CAP THAT APPLIES TO PAID USAGE IS SET EXCLUSIVELY IN THE PAYG AGREEMENT. IF ANY CAP IN THIS SECTION IS HELD UNENFORCEABLE IN A GIVEN JURISDICTION, OUR LIABILITY THERE IS LIMITED TO THE MAXIMUM EXTENT PERMITTED BY LAW.

15.3 Carve-outs. Nothing in these Terms limits liability that cannot be limited under applicable mandatory law (including death or personal injury caused by negligence, fraud, fraudulent misrepresentation, or wilful misconduct). Under Swiss law, Article 100 paragraph 2 of the Swiss Code of Obligations applies; the remainder of our liability is excluded to the fullest extent permitted by law.

15.4 One-year limit. Any claim arising out of these Terms must be commenced within one (1) year after the cause of action accrues; thereafter it is permanently barred, unless a longer period is mandatory.

16. Indemnification

You will defend, indemnify, and hold harmless idOS and its affiliates, directors, officers, employees, agents, Node Operators, and sub-processors from and against any claims, liabilities, damages, losses, regulatory fines or penalties, costs, and expenses (including reasonable attorneys' fees) arising out of or related to:

- your (or your Authorised User's or End User's) breach of these Terms, the PAYG Agreement (once applicable), the terms of any upstream service, or applicable law;
- your use of the service or of any third-party service (including the KYC Provider);
- your product, service, content, configuration, or business model, including any unlicensed or illegal activity;
- your failure to obtain valid End-User consent or to provide required notices (see Section 5.3);
- any claim brought by your End User or by another person arising from your acts or omissions;
- any claim by a KYC Provider, Node Operator, payment processor, or other third party arising from your acts or omissions, including any data-breach claim insofar as it affected your End Users or originated in your environment;
- your processing of personal data, including any claim or fine under data-protection or privacy law (GDPR, UK-GDPR, US state privacy laws, biometric-information laws, and analogous laws);
- any infringement or misappropriation of third-party intellectual-property, privacy, or publicity rights by you or your End Users;
- any chargeback or payment dispute initiated in breach of Section 6.5;
- your breach of sanctions or use of the service to onboard a sanctioned person or a person in a Restricted Jurisdiction; and
- any joint-controller, agency, partnership, or co-defendant theory advanced by a regulator or court in respect of the foregoing.

You'll get reasonable control of the defence and settlement (with our reasonable cooperation at your expense), except you may not settle any claim that imposes liability or admission on us without our written consent. We may participate with counsel of our choice at our own expense.

17. Term and Termination

17.1 Term. These Terms take effect on your acceptance and continue until terminated.

17.2 Termination by you. You may terminate at any time by ceasing use of the service and notifying us at legal@idos.network.

17.3 Termination by us. We may, at our sole discretion and without liability: (a) terminate **for convenience** on notice; or (b) **for cause**, immediately suspend or terminate (and revoke API Credentials) if you breach these Terms, the PAYG Agreement, or applicable law; if you become insolvent or undergo a change of control we reasonably object to on legal, reputational, sanctions, or

operational grounds; if we reasonably believe your use creates material legal, regulatory, security, reputational, or operational risk for us; or if we're required to do so by law or by a legitimate request of a regulator, KYC Provider, or other partner.

17.4 Effects. On termination: your right to access the service ceases immediately; you must stop using API Credentials, idOS materials, and our Confidential Information, and delete or return them; within 30 days you must delete or anonymise End-User personal data obtained through the idOS Relay (except where retention is required by law or for legal claims); any accrued fees remain payable; we may delete Customer Account data after a reasonable period (currently 90 days, subject to change), subject to legal retention requirements; idOS profiles already created continue to exist under the idOS User Agreement; on-chain and Stored Information continues to be governed by the idOS Network's architecture and may remain stored or public.

18. Changes to These Terms

We may modify these Terms (and any incorporated document) from time to time. We'll notify you of material modifications through the idOS Developer Console or by email, and give at least 30 days' advance notice before they take effect for Production, except where the change is required by law, is necessary to address a material security or operational risk, or is to your benefit (in which case it may take effect immediately). Continued use after the effective date is your acceptance; if you don't accept, your remedy is to terminate before that date.

19. Governing Law and Jurisdiction

These Terms are governed by the substantive laws of **Switzerland**, excluding its conflict-of-laws principles and the UN Convention on Contracts for the International Sale of Goods. The competent courts of **Zug, Switzerland** have exclusive jurisdiction over any dispute arising out of or in connection with these Terms. Either party may seek injunctive or equitable relief in any court of competent jurisdiction to protect intellectual property, Confidential Information, or other rights that monetary damages cannot adequately protect.

20. Notices

Notices to us must be sent to **legal@idos.network**, with a copy to our registered office. Notices to you go to the email address on your Customer Account or through the idOS Developer Console. You're responsible for keeping your contact information current and for monitoring those channels.

21. Force Majeure

Neither party is liable for any delay or failure to perform (other than payment and indemnification) caused by events beyond its reasonable control, including acts of God, war, terrorism, civil unrest, governmental action, sanctions, internet or telecom outages, denial-of-service attacks, blockchain network congestion, forks, oracle failures, smart-contract bugs in upstream protocols, pandemics, and cyberattacks.

22. General

22.1 Entire agreement; order of precedence. These Terms, with the documents incorporated by reference (PAYG Agreement once applicable, idOS Privacy Policy, idOS Transparency Document, idOS User Agreement, Documentation, and any data-processing addendum or sub-processor list executed between the parties), are the entire agreement on this subject. In conflict, the order of precedence is: (i) any separately signed enterprise agreement, (ii) the PAYG Agreement (for paid usage), (iii) these Terms, (iv) the Documentation.

22.2 Assignment. You may not assign without our prior written consent (including by operation of law, merger, or change of control). We may assign in a corporate reorganisation, sale of business, merger, or transfer of assets, including to a successor or affiliate.

22.3 No partnership; no third-party beneficiaries. Nothing creates any agency, partnership, joint venture, employment, or fiduciary relationship. End Users are not third-party beneficiaries.

22.4 Severability; waiver. If any provision is unenforceable, the rest stays in force and the invalid provision is replaced by a valid one closest to the original intent. No failure or delay in exercising any right is a waiver.

22.5 No set-off. You must pay all amounts due to us free of set-off, counterclaim, deduction, or withholding, except as required by law or as we authorise in writing.

22.6 Language. These Terms are concluded in English. Any translation is for convenience; the English version governs in case of conflict.

22.7 Electronic acceptance. You consent to electronic communications. Your electronic acceptance (clicking, checking a box, or signing a wallet message) is your binding signature.

22.8 Export controls; anti-corruption. You'll comply with applicable export-control, anti-bribery, and anti-corruption laws.

22.9 Interpretation. Headings are for convenience only. "Including" means "including without limitation".

Questions about these Terms: legal@idos.network.
